

## DeBru SENSORS and CONTROLLERS ORP,PH,TDS,DO,TSS,BOD,TSS,CL2.

Now a days sensors are used for every parameter monitoring such as purified water quality, sewage water quality, effluent water quality, where sensor play major roles.

### APPLICATIONS

- Monitoring water quality.
- Detecting contaminants.
- Monitoring septic systems for discharges.
- Measuring levels of nutrients in surface waters.

### TRANSMITTER

### SENSOR

- Built in Analog output 4-20mA
- Built in 2-relays
- Optional outputs RS485,RS232,CAN etc
- customzied specail transmitter available
- All water requirements sensors PH,TDS,DO,COD,BOD etc
- available in tabletop, online, handle
- available galvanic, photo electric, ultra sonic etc
